→ Our Services

- juwi India brings you a full-service, specialist PV solution - be it for free-field, roof-top or off-grid projects.
- All juwi power plants are designed, engineered and constructed according to German standards.
- juwi India's services cover the entire project process chain – from planning, construction to on-site operation and maintenance. That guarantees our customers the best results for their investment.
- juwi India also offers turnkey solutions including land and power evacuation.
- In addition to turnkey EPC, energy sale and open access solutions are offered for IPPs, Industries and developers.

10MWp, free-field PV power plant, Rajkot, Gujarat

51MWp, free-field PV power plant, Charanka, Gujarat

24MWp, free-field PV power plant, Jodhpur, Rajasthan

→ The juwi group

juwi was founded in 1996 by Fred Jung and Matthias Willenbacher. Together, they developed the company headquartered in Germany from a two-person operation for planning wind farms into a world-renowned group with more than 1000 employees and an annual turnover of over EUR 575 Million in 2015. juwi offers its clients service expertise in all areas of renewable energy all the way along the value chain – from acquisition of sites to planning, construction, financing and management of the systems. In the solar power sector, juwi has already realized and commissioned more than 1,600 photovoltaic systems worldwide with a total output of over 2200 MWp.
